THE DRAW — settled under the Fair Draw Standard v1.0

Revealed salt (the secret ingredient, revealed only after the seed block)

ff8122a4f0c8e80f3ea50f14e8c6f5ef68ef5f0428ddc0416f99d6475f5350cb

MATCHES — re-hashing this salt reproduces the salt commitment sealed before the draw, so it could not have been swapped.

Seed block (a public blockchain network, produced after the draw — blue score 507,646,035)

Winning slice (first 12 hex of the combined hash)

aeae8bbe436a

The sum — how the slice becomes the winning ticket

192,064,692,044,650 ÷ 30 tickets
= 6,402,156,401,488 whole times, with 10 left over
remainder 10 + 1 = ticket No. 11

HOW TO CHECK THIS YOURSELF

1. Re-seal the published entry list and confirm it reproduces the master seal above. One changed ticket and it would not match.
2. Re-hash the revealed salt and confirm it reproduces the salt commitment that was sealed before the draw.
3. Combine the salt with the seed block (sha256), take the first 12 hex as the winning slice, read it as a number, divide by the number of tickets; the remainder plus one is the winning ticket.
4. The full, interactive version — a step-by-step recheck and the complete entry list — is public at:
